EXTENSION DISASTER  
EDUCATION NETWORK

*EDEN reduces the impact  
of disasters through  
research-based education.*

[www.EDEN.lsu.edu](http://www.EDEN.lsu.edu)

*The Extension Disaster Education Network (EDEN) links Extension professionals from across the U.S. and various disciplines to use and share resources to reduce the impact of disasters.*

## About EDEN

When disaster strikes, people turn to Extension for reliable information and educational resources to aid in recovery efforts.

While Extension is not considered an “emergency response” agency, it often is called upon before, during, and after disasters to provide objective education. EDEN equips county-based Extension educators to participate in local disaster management and recovery efforts.

## EDEN Online

The EDEN website is built for and maintained by the EDEN membership that is made up of Extension professionals nationwide. EDEN’s main role is to link Extension professionals from across the U.S. and various disciplines so they can share and use resources.

## The EDEN website provides instant access to:

- A searchable database of Extension resources
- Extension professionals in all 50 states and three U.S. territories
- Coast-to-coast coverage with close-to-home education
- EDEN member university and disaster agency websites
- Educational materials tailored to help people deal with a wide-range of hazards
- Food and agricultural defense educational resources

## EDEN Courses

EDEN provides course materials online for classroom teaching. All courses are available at:

[www.EDEN.lsu.edu/EDENCourses](http://www.EDEN.lsu.edu/EDENCourses)

- Plant Biosecurity Management Course
- OnGuard: Protecting America’s Food Supply
- Ready Business
- Pandemic Preparedness for Business
- Pandemic Influenza Preparedness for Faith-Based Organizations
- Animal Agrosecurity and Emergency Management
- Family Preparedness
